

The Complete QC Solution for Roche Systems

Bio-Rad Independent Quality Controls and Data Management

Avoid Costly Errors

Minimize Risk

Optimize Your Daily QC for Roche **cobas**® Systems

Bio-Rad makes it easy to monitor the assay precision of Roche **cobas**® systems. Our independent quality controls, together with Unity QC Data Management, help bring quality test results, data analysis, and compliance to your diagnostic laboratory.

Select from our diverse portfolio of independent controls and connect with a peer network of clinical laboratories to improve the reliability of your patient test results.

Portfolio of Bio-Rad Quality Controls

Select from our broad portfolio of independent quality controls designed to match the test menu of your Roche Systems

- Cardiac Assessment Controls
- Coagulation Controls
- Diabetes/Hemoglobin Controls
- Hematology Controls
- Immunoassay Controls
- Immunology/Protein Controls
- Infectious Disease Controls
- Serum Chemistry Controls
- Therapeutic Drug Monitoring Controls
- Toxicology Controls
- Tumor Marker Controls
- Urinalysis Controls
- Urine Chemistry Controls

Quality control isn't just. . .

- A cost - *it's an investment*
- It's not just a task - *it's a practice*
- It's not just something you do - *it's everything you do*

Meet Compliance Requirements

Improve Workflow

Experience the Bio-Rad QC Advantage

Take your laboratory performance to the next level and transform your QC processes with Bio-Rad quality control products and Unity data management solutions for global Roche **cobas**® systems.

With our breadth of analyte coverage and format options we have the right product solutions for every lab. Integrated with Unity Data management solutions you gain access to the worlds largest peer group database with over 29,000 participating labs processing over 60 million QC results every month.

Empowering exceptional Roche labs

Precise controls

Elevate your performance with our extensive portfolio of the highest quality independent QC to simplify your laboratory's processes

Powerful QC peer groups

Improve analytical quality and confidence in your results with the world's largest QC peer group comparison

Time savings

Minimize cross over studies and eliminate lot-to-lot variability with longer product shelf life and convenient lot reserves

Strong support

Unsurpassed education and global support to assist with QC troubleshooting and training excellence

Rely on the proven market leader, providing unmatched Quality Control expertise and support for over 30 years.

Intelligent QC Starts with IntelliQ

IntelliQ quality controls provide enhanced workflow solutions for next generation platforms

Optimize Workflow

Increase productivity, minimize errors and improve turnaround time by eliminating manual steps.

Increase Efficiency

Unique barcodes for sample tracking and automatic download of lot specific QC data values.

Improve Performance

Access the Unity data management program and large peer groups.

Achieve Quality Goals

Use advanced Unity software tools to support your lab's risk management program and simplify compliance reporting.

InteliQ

The Smart QC Choice for Roche **cobas**® systems

InteliQ quality controls transform Roche QC workflows with load-and-go efficiency combined with robust data management.

InteliQ quality controls are pre-barcoded plastic tubes, similar to patient samples, that are ready to load directly onto your Roche **cobas**® instrument. Your chemistry and immunoassay QC workflows can now be automated, reducing turnaround time, limiting manual errors, and increasing your lab's overall efficiency. Combined with Unity's robust data management tools, InteliQ provides a smarter way to manage your QC.

Eliminate manual preparation steps

Barcoded, load-and-go tubes eliminate the need to reconstitute lyophilized product and perform tedious pour-off steps, simplifying your workflow and reducing turnaround time from patient samples to results. InteliQ tubes are ready to load directly onto a Roche **cobas**® platform. Simply load, and go!

Automatic download of Value Assignment Data for Roche **cobas**® 8000 modular analyzer series

Roche **cobas**® link software is pre-populated with InteliQ value assignment data for convenient automatic download of values. This automated process eliminates manual data entry steps, reducing risk of human error and saving you even more time.

Unite with peers and data from all over the world

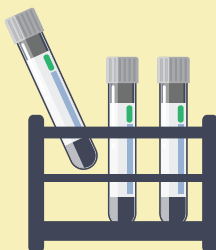

Combining InteliQ's load-and-go efficiency with Bio-Rad's Unity Data Management Program delivers valuable insight into your lab's QC assessment. Connect and compare data with labs worldwide to help bring confidence to your results.

1. QC Product Set-up

Download VA data directly from Roche **cobas**® 8000 workstation via **cobas**® link.

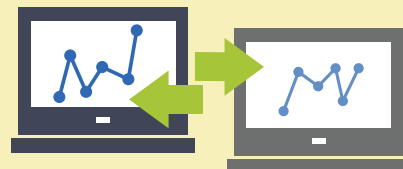

2 min to complete (approximately)

2. Load

Load InteliQ tubes onto instrument.
No manual pour off required

Simply load, and go!

3. Compare Data

Access the Unity Data Management Program to compare results.

Consolidate your Roche QC

Over 25 Roche controls can be exchanged for 9 IntelliQ controls, driving significant savings and efficiencies for your lab.

- PreciControl ClinChem Multi 1 & 2
- TDM Control Set 3 Levels

IntelliQ Assayed Multiquel Control

- PreciControl ClinChem Multi 1 & 2
- Control Set Myoglobin
- PreciControl Trop T
- PreciControl Troponin
- PreciControl Cardiac
- Homocysteine Control Kit

NEW IntelliQ Cardiac Advance

- PreciControl ClinChem Multi 1 & 2
- Precinorm/Precipath Fructosamine
- TDM Control Set 3 Levels
- PreciControl Universal
- PreciControl Tumor Markers
- PreciControl Varia
- PreciControl Multimarker
- PreciControl Growth

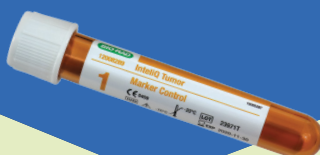

IntelliQ Immunoassay Plus Control

- PreciControl ClinChem Multi 1 & 2
- Cystatin C Control Set
- PreciControl Lp(a)
- RF Control Set
- β 2 Microglobulin Control Set
- PreciChrom I/II
- PreciControl Universal

IntelliQ Immunology Control

- PreciControl ClinChem Multi 1 & 2
- β 2 Microglobulin Control Set
- PreciControl Universal
- PreciControl Tumor Markers
- PreciControl Lung Cancer
- PreciControl HE4
- PreciControl Growth

IntelliQ Tumor Marker Control

- PreciControl Varia
- PreciControl Vitamin D
- PreciControl Multimarker
- PreciControl Growth
- PreciControl Thyro AB

IntelliQ Specialty Immunoassay Control

- AMM/ETH/CO2 Control

IntelliQ Ethanol/Ammonia Control

- Homocysteine Control Kit

IntelliQ Homocysteine Control

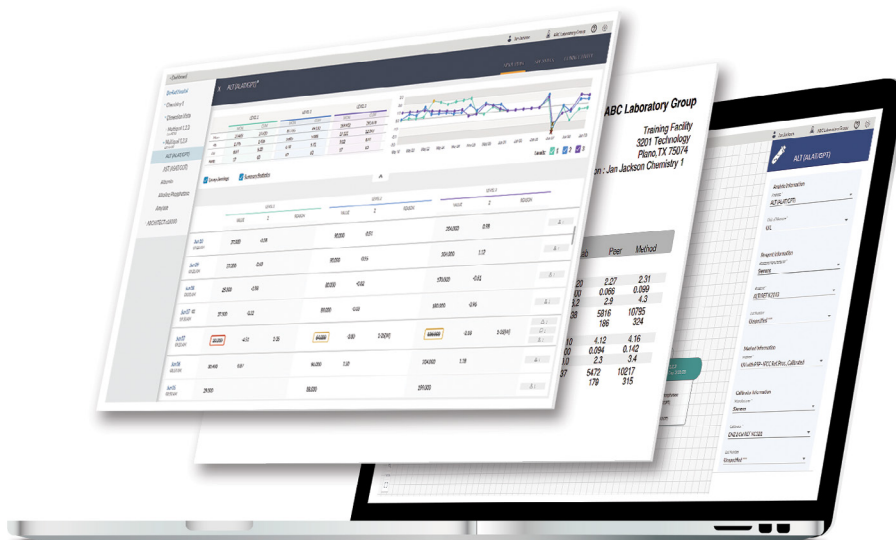

- Precinorm/Precipath PUC

IntelliQ Urine Chemistry Control

Unity QC Data Management Solutions

Join the world's largest QC peer groups of clinical laboratories

Compare

QC data with peer data from over 51,000 instruments and 30,000 laboratories globally

Customize

QC requirements for your Quality Program

Track

Key Performance Indicators (KPIs)

Comply

With CLIA guidelines, ISO 15189 or local requirements using easy tools to review QC rule violations and document corrective actions

Identify

QC failures and help troubleshoot using real-time data from powerful QC peer groups

More laboratories trust Bio-Rad quality control products than any other QC manufacturer.

Partner with Bio-Rad's Experts in Quality Control

Customer Support

Get your answers from the industry's largest QC support team.

Education

Learn more from our QC experts with on-site QC training, advanced QC seminars, and more.

Expertise

Benefit from our 30 year history of developing independent controls for hundreds of diagnostic instruments.

Contact your local sales representative or visit bio-rad.com/qualitycontrol for more information about Bio-Rad's portfolio of quality controls.

EQAS

An independent, external assessment of performance in comparison to your peers.

QCNet.com/eqas

Independent QC

Ongoing, proactive, unbiased daily QC that helps identify errors as they occur or begin to trend.

QCNet.com/independentqc

Unity

QC Data Management tools that help you create a strategy to reduce risk and streamline QC workflow.
